Together we grow

Premium circular flexible packaging and barrier solutions

Over 40 years of experience

The Aluflexpack Group has been developing and manufacturing premium circular flexible packaging and barrier solutions for leading global brands as well as smaller and family owned businesses at an industrial scale for over 40 years. A blend of passion, know-how, experience, responsiveness and creativity result in unique

products and services for our customers. Operating in 16 locations across Europe with over 1600 highly skilled employees, we are converting aluminium, paper and plastic films to high quality final products: films and foils, lids, containers and pouches.

With state-of-the-art machines Aluflexpack provide a wide range of outstanding products in form of different product types - films & foils, lids, containers and pouches.

We have state-of-the-art machines to produce outstanding quality pouches - offering a wide range from retortable to various shaped, zip and spout pouches

The Aluflexpack offers unique benefits to its customers considering that our pouches are produced in a completely integrated process starting with material (foil) up to the pouch forming and optional zip or spout inserting, which guarantees short delivery terms, development of new products and the highest level of quality and service. Strong partnership in the field of „pouch filling machinery and technology” – excellent for new product launches or innovation projects!

SCAN FOR MORE ABOUT OUR SUSTAINABILITY!

Quality assurance certificates

We employ market standards in our management approach to guarantee that all our processes are led reliably and safely, providing top results for all our stakeholders, as confirmed by the most relevant institutions.

Sustainability certificates

Our comprehensive approach to managing all market related topics is measured against the most reliable sustainability indicators, but also the management of key stakeholder relations and their inclusion in the estimation of all topics surrounding product development.

Possibilities

Retortable

We provide retortable pouches made of multiple high quality layers, capable of withstanding the retortability process demands (heat, pressure,...).

Materials

Pouch structure can be customized depending on product and customer wishes, from a basic laminated structure to a multilayer barrier material to ensure best possible product protection.

Shapes

We can offer extensive variety of shapes customized depending on your customer needs, products or brand...from round edges suitable for easier usage and handling to special shapes customized to fulfill special product features and customer requirements. Simultaneously, the nature of the brand and product are most memorably highlighted.

Bottom types

Relative to the needs and products packed in pouches, we offer possibilities of producing different types of bottoms more suitable for volume and quantity of products packed, or for better stability and presentation on the shelves when displaying products at the point of sale.

Dimension range

Specific product type requires certain standard or packaging size and with our dimensions ranging from small and standard sizes up to extra large size pouches, you will surely be able to fulfill all market demands.

Colours

State-of-the-art machines in our plants are capable of printing up to 12 colours.

Printing

High quality degree enabled by specialized and sophisticated machines, able to convert the most demanding designs and graphical solutions into elegant and attractive printing with breathtaking preciseness, eye-catching to your potential customers.

Opening

Pouches are designed in a way to enable customers quick and easy opening of the products with addition of e.g. tear notches using special manufacturing technology and materials that are suitable for easier tear.

Zipper types

Based on package size, material structure and product weight we provide a wide range of zipper profiles to fulfill all customer requirements and protect the product.

Spout & Cap types

Spouts are available in many different types and sizes for the most diverse customer demands - to enable the consumer to dose the product out of the pouch, reclose it after usage and save the product for a later moment.

Hanging

These features enable not only optimum positioning and presentation on retail shelving, but also facilitate its reliable storage. These pouches therefore represent an extremely practical and, simultaneously, cost-effective packaging solution suitable for use with broad spectrum of products.

R&D and Innovation - sustainable product development and design

Continuous development in collaboration with customers

We believe in growth through sustainability-driven innovation, working continuously on upgrading our products and modernising our production, while engaging experts in manufacturing top-quality flexible packaging. Tailor-made customer solutions, both technical and logistical, are the focus of our daily work.

regulations of sustainability, is our core business. We are determined to produce excellent packaging that secures long shelf-life and sustainability throughout the life cycle.

The development and large-scale manufacturing of new and state-of-the-art packaging solutions, aligned with the latest demands and

Exploring new uses of existing materials, as well as introducing recycled materials while maintaining the quality and safety of our products and consumer goods they carry are our biggest and most exciting challenges now, and in the years to come.

Sustainable product strategies

- Mono-materials: development of materials with a lower environmental footprint
- Resource management: decrease of material thickness, less use of varnishes and inks
- Single portion packaging
- Optimal shelf life
- Flexible lead times: optimization of printing orders and deliveries

The Aluflexpack Group advantages!

What makes an excellent quality pouch

Long lasting packaging experience

We bring circular packaging solutions to the market with more than 40 years of experience. Our formidable know-how developed by experienced experts from our production sites, equipped with state of the art technologies and equipment, builds relationships with your consumers.

Excellent quality pouch

- Supreme quality standard in production process
- Excellent printing quality using PVC - free inks
- Innovative designs & adaptability to trends
- Outstanding barrier properties ensuring protection of the packed product
- Wide range of shapes and sizes
- Convenience trough easy to open & re- closable features
- R&D - fully customer oriented
- Exceptional tailor-made service from the initial idea up to serial-production
