Together we grow

Premium circular flexible packaging and barrier solutions

Over 40 years of experience

Aluflexpack is the partner of choice for developing and large-scale manufacturing of premium circular flexible packaging and barrier solutions. As a fully integrated solution provider for long-lasting packaging experience, we serve the most demanding customers and grow in the most demanding end markets and applications for over 40 years.

A blend of passion, know-how, experience, responsiveness and creativity result in unique products and services for our customers. Operating in 16 locations worldwide with over 1600 highly skilled employees, we are converting aluminium, paper and plastic films to high quality final products: films and foils, lids, containers and pouches.

With state-of-the-art machines Aluflexpack Group provide a wide range of outstanding products in form of different product types - films & foils, lids, containers and pouches.

Aluminium lids - Your choice for packaging success!

Aluflexpack offers high-quality aluminium and plastic-based lids and lidding foils for various end markets such as Coffee, Confectionery, Dairy and other human food, as well as the Pet food market, in a wide range of dimensions, shapes, thicknesses, lacquered, co-extruded and/or printed.

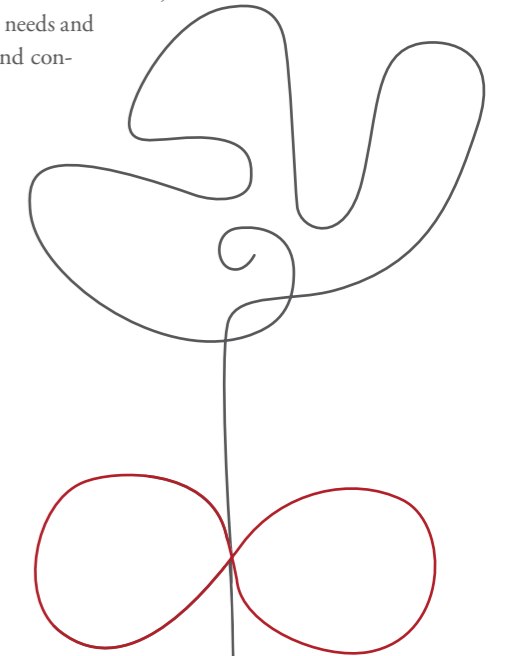

While we do work with a wide range of materials, we proudly highlight our experience and expertise in manufacturing aluminium as the preferred packaging material. Aluminium provides the perfect barrier to oxygen, mois-

ture or other external factors, while our wide range of lacquers offers the best protection for highly acidic products such as yoghurt, processed cheese or other dairy products. Aluminium and lacquer work together to prevent food waste while remaining recyclable - as aluminium always is!

Our lids are smartly designed and continuously developed in collaboration between our R&D experts and our customers, in line with their needs, as well as the needs and lifestyle of end consumers.

The Aluminium Flower represents the sustainable growth enabled by its excellent properties and reusability.

-  RECYCLABLE & REUSABLE
-  LIGHTWEIGHT
-  BARRIER
-  HEAT RESISTANT
-  LONGER SHELF LIFE
-  ENERGY SAVING
-  REDUCING FOOD WASTE

SCAN FOR MORE ABOUT OUR SUSTAINABILITY!

Quality assurance certificates

We employ market standards in our management approach to guarantee that all our processes are led reliably and safely, providing top results for all our stakeholders, as confirmed by the most relevant institutions.

Sustainability certificates

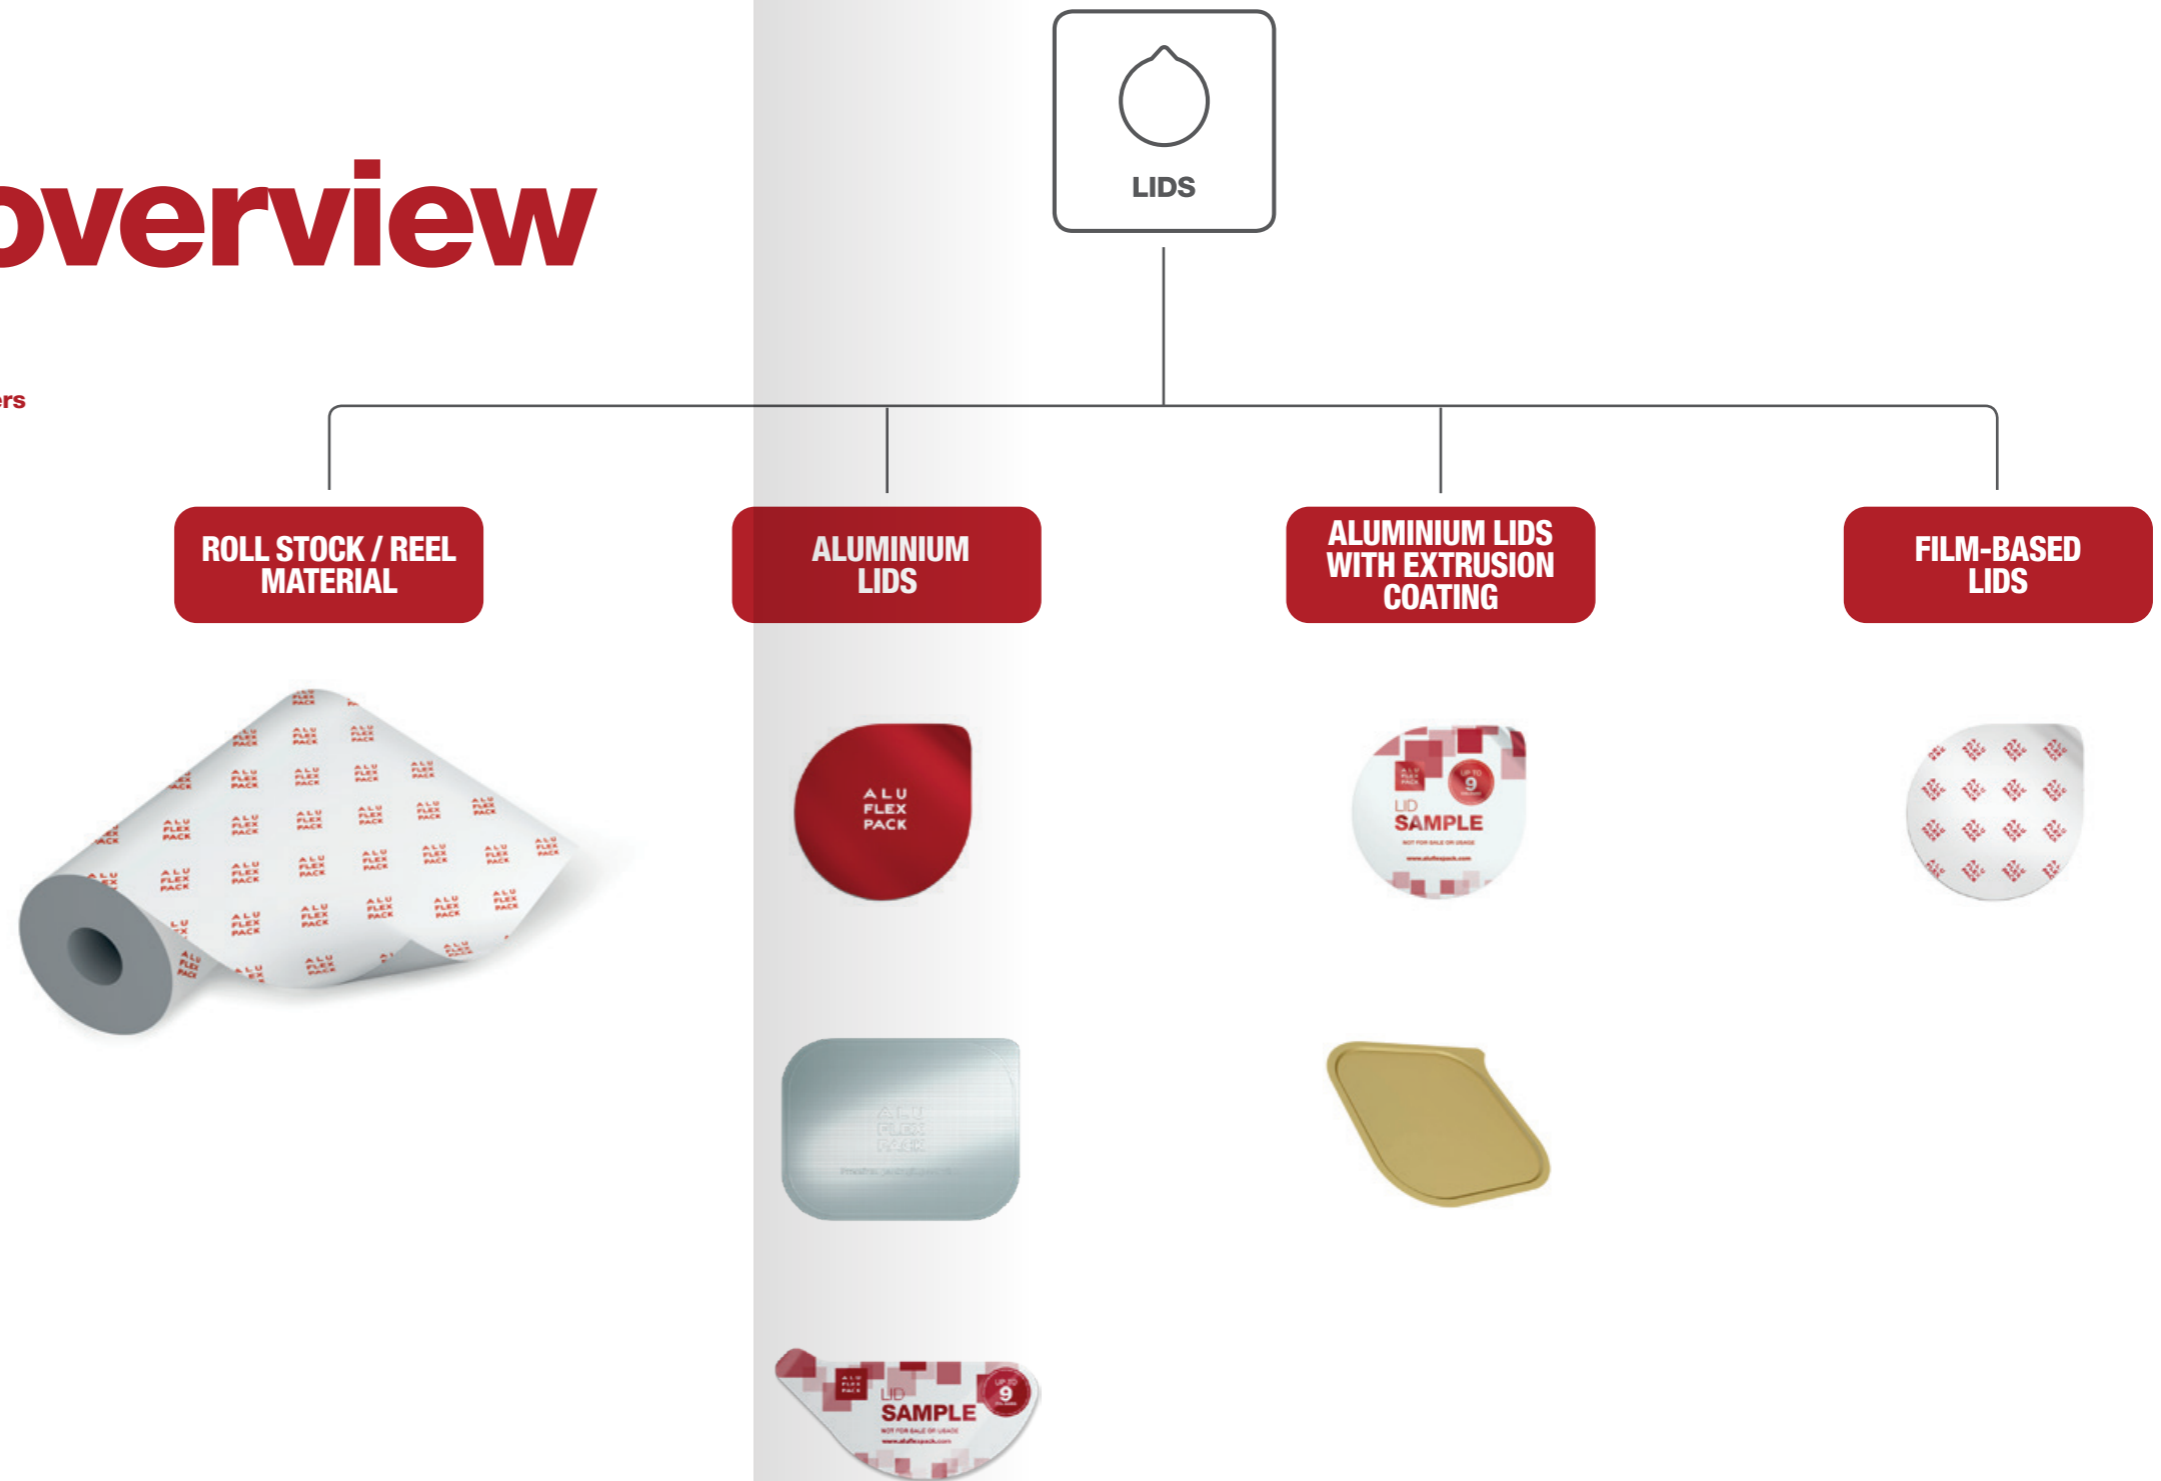

Our comprehensive approach to managing all market related topics is measured against the most reliable sustainability indicators, but also the management of key stakeholder relations and their inclusion in the estimation of all topics surrounding product development.

Content

p. 9	Roll stock / Reel material	p. 12-13	Aluminium lids with extrusion coating
p. 10-11	Aluminium lids	p. 14	Film-based lids

Possibilities

Retortable

We provide retortable packaging made of several high-quality layers that withstand the demands of the retort process (heat, pressure, etc.).

Materials

The punched-lid structure can be customised from single-layer lids (Alu, PET, lid) to multilayer lids (coextruded or laminated), to ensure the best possible product protection.

Shapes

We can offer a wide range of lid shapes customised to your customer needs, products or brand. With interesting shapes, together we successfully improve the positioning of the brand and the attractiveness of the product during development.

Dimension range

Specific product types require different packaging sizes. We meet all market demands by offering standard and customised packaging sizes, depending on the customer's demands and wishes.

Colours

State-of-the-art machines in our plants are capable to print up to 12 colours in Rotogravure and up to 9 colours in Flexographic printing.

Printing

High-quality printing is enabled by specialised and sophisticated machines, able to convert the most demanding designs and graphical solutions into elegant and attractive printing with breathtaking precision, so as to catch potential customers' eyes.

Sealing

Our products can be sealed (hot sealing and cold sealing) to different substrates by using suitable materials.

Opening

Our lids are smartly designed in a way that enables easy customer opening of the packaging, by using the special lengths and shapes of the lid tab, selected materials and lacquers.

Embossing

In order to ensure perfect runability on the filling machines and better attractiveness of the brand appearance, we can offer various embossing possibilities - unembossed, partially embossed (rim, logo, or smart) or fully embossed (random, linen, or pin dots).

Separation lacquers

We offer separation lacquers (separation points, text, images, etc.) as another option for flawless machine runability and better brand appearance through a clean design.

Step down

We offer flat and step-down lids, depending on customer needs.

R&D

We are fully customer oriented - we develop tailor-made products together with our customers to fulfill all their needs and wishes.

ROLL STOCK / REEL MATERIAL

We offer various lidding foil solution as excellent protection for multipack packaging.

Advantages:

- Sealable against different materials
- Different material possibilities – aluminium, monomaterial plastic, or multilayer solutions
- Printed and/or lacquered

Applications:

- Dairy: Yoghurt, pudding, spreads, processed cheese...
- Confectionery: Chocolate spread, desserts
- Other food: jam, honey, condiments, dips, water

Aluminium lidding foil for coffee capsules

Aluminium is the prime choice material for preserving the unique aromas, flavours and freshness of coffee.

We offer a wide range of printed or lacquered aluminium foil, as well as embossed or unembossed lidding foil for closing the capsule.

Together with the customer we develop aluminium foil for deep drawing and the lidding foil for closing the capsule, creating an easy to use, single portion packaging.

ALUMINIUM LIDS

Advantages:

- Sealable to various cup material substrates
- Excellent printing quality using flexo print (up to 9 colours)
- Various shapes and dimensions possible
- Wide embossing options: standard, rim, tailor-made partial embossing, or separation lacquer
- Different dimensions available
